---

## Summary

Highly skilled **Full Stack Developer** with 2+ years of experience. Specialize in creating effective solutions for complex **coding challenges** and good in **Problem-Solving, Logic building** and delivering **high-performing web applications**. My strong **communication skills** enable me to collaborate effectively with teams and clients.

---

## Technical Skills

**Languages:** HTML, CSS, JavaScript, **PHP, SQL, MySQL**.

**Frameworks:** Tailwind, Bootstrap, jQuery, **Livewire, Inertia Js, Laravel, Vue Js**.

**Web Development:** **Object-Oriented Programming**, Logic building, API handling, front-end, back-end development.

**Web Dev Tools:** VSCode, **Postman**, Git, **GitHub, Version Control**, Chrome DevTools, Figma.

---

## Projects / Experience

### [HelpinCode \(Forum\)](#)

Jul 25, 2024 to Aug 8, 2024

- **Developed** a fully functional **forum** facilitating discussions among developers to solve **coding problems**.
- **Engineered** a powerful back-end using **PHP** and the **Laravel** framework, with **Eloquent ORM** driving a 40% improvement in database efficiency.
- **Implemented** a highly responsive front-end with Tailwind CSS, and Livewire, boosting user engagement by 50% through **real-time updates** and seamless interactions.

### [Digital Duniya \(Blog\)](#)

Jun 9, 2024 to Jun 24, 2024

- **Developed** a high performance **blog web application** that empowers admins to efficiently manage blog posts.
- Used a Tailwind template and built the backend with **PHP** and **Laravel**, using **Eloquent** for database management.
- **Implemented** advanced **SEO** strategies, boosting search engine rankings and increasing **organic traffic** by 50%.

### [Pixel Positions \(Job Board\)](#)

Jun 1, 2024 to Jun 8, 2024

- **Built** a job board facilitating companies to post job openings and job seekers to find and apply for jobs.
- **Handled** the back-end with **PHP** and **Laravel**, creating a **secure system** for managing job postings.
- **Created** advanced **filtering** and **search** features, allowing users to easily find jobs based on location, industry, or keywords, enhancing the job matching process by 80%.

### [Weather App \(API\)](#)

Jul 11, 2024

- **Created** a weather web app allowing users to check **real-time weather** conditions by entering a city name
- **Integrated** a **weather API** to fetch data on temperature, humidity, wind and weather conditions with 95% accuracy.
- Used a Tailwind CSS weather template and **Laravel** for **handling API** requests and processing weather data.

### [Core PHP Projects](#)

Jul 4, 2024 to Jul 8, 2024

- **Router:** A custom routing system that supports all **HTTP requests** using the **MVC pattern** inspired by Laravel.
  - Designed a **Secure Login System** with 99.9% effectiveness in security, ensuring reliable authentication and secure access management for all users.
  - **Note Taker:** Enabled users to perform **CRUD** operations on their notes with a focus on usability and organization.
  - **URL Shortener:** converts long URLs into **shorter links**, which redirect users to the original long URL when clicked.
  - **Designed** the front-end with Tailwind CSS and applied Best Practices to create a strong back-end using **PHP OOP** with **MySQL** for reliable database management.
- 

## Education

**F.G Degree College (Cantt)**

**ICS (Intermediate in Computer Science)**

Studied programming through resources such as Laracasts, Laravel Docs, Google, and YouTube.

**Kharian, Pakistan**
